FLEXIBLE SYSTEM

EFFICIENT COMMUNICATION

SAVINGS

I CHOOSE:

■ COMFORT OF WORK

Accordingly arranged and large buttons are making work with your phone much comfortable. Legible and large backlit LCD display with adjustable contrast, will make use of your phone more convenient. Properly shaped and light handset and high sound quality guarantee user satisfaction. Friendly menu - similar to used in mobile phones - and navigation keys allow you to use quickly full range of system phone's functions. Programmable buttons can be assigned to a number of functions, services or phone numbers.

■ FUNCTIONALITY

Slican CTS-202 system phone is designed to work with Slican MAC-6400, CCT-1668 and CXS-0424 servers. Each function of phone performs users high expectations. CTS-202 will tell you what is duration of your call and how much it costs. Handy information about incoming calls, dialed numbers, missed calls allows you organize your work much more efficient. Access to the two phone books (public and private), and internal numbers list allows fast communication with selected subscriber.

■ MOBILE EXTENSION

CTS-203.IP system phone can be installed and used wherever there is Internet connection. Additional advantage is PoE (Power over Ethernet) standard. Slican MAC-6400, CCT-1668 and CXS-0424 servers treat CTS-203.IP system phone as part of internal network. From now on phone communication with branch offices or abroad employees, tele-workers etc. can be done without incurring unnecessary costs, while ensuring the highest quality connection.

■ MORE CAPABILITIES

Additional functionalities are available with CTS-202.BT. System phone allows connect up of wireless bluetooth headphones, thanks to your work will be much comfortable, you can talk by phone and work on your computer simultaneous. CTS-202.BT is a practical mobile solution for your business or organization.

For your comfort and to increase number of programmable keys, you may connect to each Slican CTS-202 and CTS-203 series system phone up to 5 CTS-232 expanding consoles. With consoles you may program up to 162 buttons.
