

Comfortable system phones Slican CTS-220

Multi-functional, pleasant to use, easy to install Slican system phones. You can choose classical model CTS-220.CL and perfect system IP phone – CTS-220.IP. For each model – you can connect CTS-338 consoles and instale additional Bluetooth module.

CTS-220.CL / 220.IP

CTS-220.CL / 220.IP with CTS-338 console

Phone profile is created and stored in the Slican PBX memory. The phone can be used immediately after power connection, without complicated and time-consuming programming. Programmable BLF buttons allow you to create individual functions, services or create a list of handy contacts. For your comfort and to increase number of programmable keys, you may connect to each Slican CTS-220 system phone series up to 4 CTS-338 consoles. With consoles you may program up to 162 buttons.

COMFORT OF WORK

Legible and large back lighted LCD display with adjustable contrast, will make use of your phone more convenient. Properly shaped and light handset and high sound quality, guarantee user satisfaction. Friendly menu and navigation keys allow you to use quickly full range of system phone's functions. Programmable buttons can be assigned to a number of functions, services or phone numbers.

FUNCTIONALITY

Slican CTS-220 system phones are designed to work with Slican* NCP, IPL-256, IPM-032, IPU-14, IPS-08 (only CTS-220.IP), MAC-6400 PBX-es. CTS-220 will tell you what is duration of your call and how much it costs. Handy information about incoming calls, dialed numbers, missed calls allows you organize your work much more efficient. Access to the two phone books (public and private), and internal numbers list allows fast communication with selected subscriber.

MORE POSSIBILITIES

Slican CTS-220.IP system phone can be installed and used wherever there is Internet connection. Additional advantage is PoE (Power over Ethernet) standard. CTS-220 can be equipped with Bluetooth module which allows connect up of wireless Bluetooth headphones, thanks to your work will be much comfortable, you can talk by phone and work on your computer simultaneous.
